

ECU Health

Invest in your retirement—and yourself—today, with help from the Plan and Fidelity.

YOUR GUIDE TO GETTING STARTED

Invest some of what you earn today for what you plan to accomplish tomorrow.

Your Employer offers outstanding convenience and a variety of investment options. Take a look and see what a difference enrolling in the plan could make in achieving your goals.

Benefit from:

Retirement planning tools. You have access to online tools designed to help you manage your assets as you plan for retirement.

Convenience. Your contributions are automatically deducted regularly from your paycheck.

Portability. You can rollover eligible savings from a previous Employer into this Plan. You can also take your plan vested account balance with you if you leave your Employer.

Investment options. You have the flexibility to select from investment options that range from more conservative to more aggressive, making it easy for you to develop a well-diversified investment portfolio.

Online beneficiary. With Fidelity's Online Beneficiaries Service, you can designate your beneficiaries, receive instant online confirmation, and check your beneficiary information virtually any time.

Catch-up contributions. If you make the maximum contribution to your plan account, and you are 50 years of age or older during the calendar year, you can make an additional catch-up contribution of \$7,500 in 2024.

To learn more about what your plan offers, see "Frequently asked questions about your plan" later in this guide.

Participate in your plan and invest in yourself today.

Frequently asked questions about your plan.

Here are answers to questions you may have about the key features, benefits, and rules of your plan.

How do I enroll in the Plan?

Enroll online at any time by visiting www.netbenefits.com/atwork or by calling the Fidelity Retirement Benefits Line at 1-800-343-0860. To enroll in the Plan, you would choose a contribution percentage and select your investment options.

How much can I contribute?

Through automatic payroll deduction, you may contribute between 1% and 80% of your eligible compensation. Sign up online by accessing the “Contribution Amount” section on NetBenefits®, or by calling the Fidelity Retirement Benefits Line at 1-800-343-0860.

What is the IRS contribution limit?

The IRS contribution limit for 2024 is \$23,000.

What catch-up contribution can I make?

If you have reached age 50 or will reach 50 during the calendar year January 1 –December 31 and are making the maximum plan or IRS contribution, you may make an additional catch-up contribution each pay period. The maximum annual catch-up contribution is \$7,500. Going forward, catch-up contribution limits will be subject to cost of living adjustments (COLAs) in \$500 increments.

What is the Roth contribution option?

A Roth contribution to your retirement savings plan allows you to make after-tax contributions and take any associated earnings completely tax free at retirement - as long as the distribution is a qualified one. A qualified distribution, in this case, is one that is taken at least five tax years after your first Roth contribution and after you have attained age 59½, or become disabled or die. Through automatic payroll deduction, you can contribute between 1% and 80% of your eligible pay as designated Roth contributions, up to the annual IRS dollar limits.

When is my enrollment effective?

Your enrollment becomes effective once a deferral percentage is elected, which initiates deduction of your contributions from your pay. These salary deductions will begin as soon as administratively possible typically within one to two payroll cycle.

How do I designate my beneficiary?

If you have not already selected your beneficiaries, or if you have experienced a life-changing event such as a marriage, divorce, birth of a child, or a death in the family, it’s time to consider your beneficiary designations. Fidelity’s Online Beneficiaries Service offers a straightforward, convenient process that takes just minutes. To make your elections, click on the “Profile” link, then select “Beneficiaries” and follow the online instructions.

What are my investment options?

To help you meet your investment goals, the Plan offers you a range of options. You can select a mix of investment options that best suits your goals, time horizon, and risk tolerance. The many investment options available through the Plan include conservative, moderately conservative, and aggressive funds. A complete description of the Plan’s investment options and their performance, as well as planning tools to help you choose an appropriate mix, are available online.

How much should I save for retirement?

Fidelity’s online planning tools are designed to help you manage your assets as you plan for retirement.

What if I don't make an investment election?

We encourage you to take an active role in the Plan and choose investment options that best suit your goals, time horizon, and risk tolerance. If you do not select specific investment options in the Plan, your contributions will be invested in the JPMCB SmartRetirement® Passive Blend Fund CF with the target retirement date closest to the year you might retire, based on your current age and assuming a retirement age of 65, at the direction of ECU Health.

If no date of birth or an invalid date of birth is on file at Fidelity, your contributions may be invested in the JPMCB SmartRetirement® Passive Blend Income Fund CF. More information about the JPMCB SmartRetirement® Passive Blend Fund CF options can be found online.

Target Date Funds are an asset mix of stocks, bonds and other investments that automatically becomes more conservative as the fund approaches its target retirement date and beyond. Principal invested is not guaranteed.

When am I vested?

Employees hired or rehired on or after January 1, 2010 are fully vested in the Employer contributions after 12 months of service. Employees hired before January 1, 2010 are fully vested in the Employer's contributions six months from their date of hire.

Also, you are always 100% vested in your own contributions to the Plan.

Can I take a loan from my account?

Although your plan account is intended for the future, you may borrow from your account for any reason.

Learn more about and/or request a loan online, or by calling the Fidelity Retirement Benefits Line at 1-800-343-0860.

Can I make withdrawals?

Withdrawals from the Plan are generally permitted when you terminate your employment, retire, become permanently disabled, have severe financial hardship, as defined by your plan. Learn more about and/or request a withdrawal online, or by calling the Fidelity Retirement Benefits Line at 1-800-343-0860.

Can I move money from another retirement plan into my account in the Plan?

You are permitted to roll over eligible pretax and Roth contributions from another employers' 401(k) plan, 401(a) plan or a 403(b) plan. Additional information can be obtained online, or by calling the Fidelity Retirement Benefits Line at 1-800-343-0860.

Be sure to consider all your available options and the applicable fees and features of each before moving your retirement assets.

What is the Roth 401(k) Contribution Option?

A Roth contribution is available to employees who participate in the 401(k) plan. For payroll purposes, Roth contributions are treated as after tax. This feature will allow participants to make Roth contributions to their plan while taking their earnings completely **tax-free** at retirement—as long as the withdrawal is a qualified one. A qualified withdrawal is one that can be taken five tax years after the year of the first Roth contribution *and* after the participant has attained age 59½, has become disabled, or has died.

If you qualify to make traditional 401(k) contributions, you are eligible for a Roth 401(k) contribution.

How does a Roth 401(k) contribution option work?

You elect an amount of your salary that you wish to contribute to the Roth source, just as you would for your traditional 401(k). The contribution is based on your eligible compensation, not on your net pay — for example, if your total annual eligible compensation is \$40,000 per year and you elect a 6% deferral amount, then \$2,400 per year would go into your Roth 401(k) account.

Unlike your traditional 401(k) pretax contribution, with a Roth 401(k) contribution, you pay the taxes now on the contributions you make—but later your earnings are all tax-free, if you meet certain criteria.

Example: Sally earns \$40,000 and has elected to put 6% toward her Roth 401(k) contributions and 6% toward her traditional 401(k) pretax contributions on a monthly basis.

	ROTH 401(k)*	TRADITIONAL 401(k)*
Sally's monthly contribution into each account	\$200	\$200
Sally's reduction in take-home pay	\$200	\$156

*This hypothetical example is based solely on an assumed federal income tax rate of 22%. No other payroll deductions are taken into account. Your own results will be based on your individual tax situation.

Your combined Roth and traditional pretax 401(k) contributions cannot exceed the IRS limits for the year.

Would a Roth 401(k) contribution option benefit me?

The potential benefits of Roth 401(k) contributions really depend on your personal situation, but are mainly focused on your existing tax rate and your anticipated tax rate at the time of retirement. If you are contributing to a Roth, you are giving up a tax break today for a tax break in the future.

Therefore, a Roth contribution might benefit you if your tax rate in retirement were **higher** than it had been during the years you contributed.

If your tax rate were **lower** in retirement, then a traditional 401(k) might be more beneficial to you than the Roth option. Talk with a tax professional for more information on how to determine if Roth 401(k) contributions are right for you.

Is a traditional pretax 401(k) still beneficial?

Yes. For many participants, a traditional pretax 401(k) will still be the most beneficial type of retirement savings plan. We do not know what the future holds regarding tax rates. Therefore, it is not possible to predict with certainty which type of 401(k) savings will be most beneficial to a participant.

Remember, because Roth 401(k) contributions are made after tax, you may take home less money in your paycheck than you would if you contributed to a traditional pretax 401(k).

Investment Options

Here is a list of investment options for the Plan. For up-to-date performance information and other fund specifics, go to www.netbenefits.com/atwork.

Target Date Funds

Placement of investment options within each risk spectrum is only in relation to the investment options within that specific spectrum. Placement does not reflect risk relative to the investment options shown in the other risk spectrums.

Investment options to the left have potentially more inflation risk and less investment risk

Investment options to the right have potentially less inflation risk and more investment risk

JPMCB SmartRetirement® Passive Blend 2020 Fund CF-A	JPMCB SmartRetirement® Passive Blend 2030 Fund CF-A	JPMCB SmartRetirement® Passive Blend 2045 Fund CF-A
JPMCB SmartRetirement® Passive Blend 2025 Fund CF-A	JPMCB SmartRetirement® Passive Blend 2035 Fund CF-A	JPMCB SmartRetirement® Passive Blend 2050 Fund CF-A
JPMCB SmartRetirement® Passive Blend Income Fund CF-A	JPMCB SmartRetirement® Passive Blend 2040 Fund CF-A	JPMCB SmartRetirement® Passive Blend 2055 Fund CF-A
		JPMCB SmartRetirement® Passive Blend 2060 Fund CF-A
		JPMCB SmartRetirement® Passive Blend 2065 Fund CF-A

Target date investments are generally designed for investors expecting to retire around the year indicated in each investment's name. The investments are managed to gradually become more conservative over time. The investment risks of each target date investment change over time as its asset allocation changes. They are subject to the volatility of the financial markets, including equity and fixed income investments in the U.S. and abroad and may be subject to risks associated with investing in high yield, small cap and foreign securities. Principal invested is not guaranteed at any time, including at or after their target dates.

The chart below lists the assigned fund the Plan believes will best fit your diversification needs should you not select an investment option.

Your Birth Date*	Fund Name	Target Retirement Years
Before 1953	JPMCB SmartRetirement® Passive Blend Income Fund CF	Retired before 2018

This spectrum, with the exception of the Domestic Equity category, is based on Fidelity's analysis of the characteristics of the general investment categories and not on the actual investment options and their holdings, which can change frequently. Investment options in the Domestic Equity category are based on the options' Morningstar categories as of 03/31/2024. There may be a number of funds in each category and each may have a significantly different risk profile as compared to other funds within that category as well as compared to funds in other categories on the spectrum. Morningstar categories are based on a fund's style as measured by its underlying portfolio holdings over the past three years and may change at any time. These style calculations do not represent the investment options' objectives and do not predict the investment options' future styles. Investment options are listed in alphabetical order within each investment category. Risk associated with the investment options can vary significantly within each particular investment category and the relative risk of categories may change under certain economic conditions. For a more complete discussion of risk associated with the mutual fund options, please read the prospectuses before making your investment decisions. The spectrum does not represent actual or implied performance.

Investment Options

Before investing in any mutual fund, consider the investment objectives, risks, charges, and expenses. Contact Fidelity for a mutual fund prospectus or, if available, a summary prospectus containing this information. Read it carefully.

American Funds EuroPacific Growth Fund® Class R-6

VRS Code: 885007

Fund Objective: The investment seeks long-term growth of capital.

Fund Strategy: The fund invests primarily in common stocks of issuers in Europe and the Pacific Basin that the investment adviser believes have the potential for growth. Growth stocks are stocks that the investment adviser believes have the potential for above-average capital appreciation. It normally will invest at least 80% of its net assets in securities of issuers in Europe and the Pacific Basin. The fund may invest a portion of its assets in common stocks and other securities of companies in emerging markets.

Fund Risk: Foreign securities are subject to interest-rate, currency-exchange-rate, economic, and political risks, all of which may be magnified in emerging markets. Growth stocks can perform differently from the market as a whole and can be more volatile than other types of stocks. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. Additional risk information for this product may be found in the prospectus or other product materials, if available.

Fund short term trading fees: None

Who may want to invest:

- Someone who is seeking to complement a portfolio of domestic investments with international investments, which can behave differently.
- Someone who is willing to accept the higher degree of risk associated with investing overseas.

Footnotes:

- This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.
- The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 05/01/2009. These calculated returns reflect the historical performance of the oldest share class of the fund, with an inception date of 04/16/1984, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) Please refer to a fund's prospectus for information regarding fees and expenses. These adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the fund itself.

Aristotle Value Equity Collective Trust Class B

VRS Code: 858532

Fund Objective: The Fund seeks to achieve attractive long-term returns over a full market cycle.

Fund Strategy: The Fund invests primarily in U.S.-headquartered companies that have a minimum market capitalization of \$2 billion at the time of initial investment. These companies are typically high-quality businesses that the Advisor believes are undervalued based on its internal research analysis and that possess catalysts expected to narrow the valuation gap within the next three to five years.

Fund Risk: Value and growth stocks can perform differently from other types of stocks. Growth stocks can be more volatile. Value stocks can continue to be undervalued by the market for long periods of time. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. These risks may be magnified in foreign markets. Additional risk information for this product may be found in the prospectus or other product materials, if available.

Fund short term trading fees: None

Who may want to invest:

- Someone who is seeking the potential for long-term share-price appreciation.
- Someone who is seeking both growth- and value-style investments and who is willing to accept the volatility associated with investing in the stock market.

**Footnotes:**

- The investment option is a collective investment trust. It is managed by SEI Trust Company. This description is only intended to provide a brief overview of the fund.
 - This investment option is not a mutual fund.
-

DFA U.S. Small Cap Portfolio Institutional Class**VRS Code:** 891871**Fund Objective:** The investment seeks long-term capital appreciation.**Fund Strategy:** The fund, using a market capitalization weighted approach, purchases a broad and diverse group of readily marketable securities of U.S. small cap companies. A company's market capitalization is the number of its shares outstanding times its price per share. Under a market capitalization weighted approach, companies with higher market capitalizations generally represent a larger proportion of the fund than companies with relatively lower market capitalizations.**Fund Risk:** The securities of smaller, less well-known companies can be more volatile than those of larger companies. Value and growth stocks can perform differently from other types of stocks. Growth stocks can be more volatile. Value stocks can continue to be undervalued by the market for long periods of time. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. These risks may be magnified in foreign markets. Additional risk information for this product may be found in the prospectus or other product materials, if available.**Fund short term trading fees:** None**Who may want to invest:**

- Someone who is seeking the potential for long-term share-price appreciation.
- Someone who is seeking both growth- and value-style investments and who is willing to accept the generally greater volatility of investments in smaller companies.

Footnotes:

- This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.
-

Dodge & Cox International Stock Fund Class X**VRS Code:** 913787**Fund Objective:** The investment seeks long-term growth of principal and income.**Fund Strategy:** Under normal circumstances, the fund will invest at least 80% of its total assets in equity securities of non-U.S. companies, including common stocks, depositary receipts evidencing ownership of common stocks, certain preferred stocks, securities convertible into common stocks, and securities that carry the right to buy common stocks. The fund typically invests in medium-to-large well-established companies based on standards of the applicable market.**Fund Risk:** Foreign securities are subject to interest-rate, currency-exchange-rate, economic, and political risks, all of which may be magnified in emerging markets. Value stocks can perform differently than other types of stocks and can continue to be undervalued by the market for long periods of time. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. Additional risk information for this product may be found in the prospectus or other product materials, if available.**Fund short term trading fees:** None**Who may want to invest:**

- Someone who is seeking to complement a portfolio of domestic investments with international investments, which can behave differently.
- Someone who is willing to accept the higher degree of risk associated with investing overseas.

Footnotes:

- This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.
- The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 05/02/2022. These calculated returns reflect the historical performance of the oldest share class of the fund, with an inception date of 05/01/2001, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) Please refer to a fund's prospectus for information regarding fees and expenses. These adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the fund itself.

JPMCB SmartRetirement® Passive Blend 2020 Fund CF-A

VRS Code: 858687

Fund Objective: The Fund seeks high total return with a shift to current income and some capital appreciation over time as each Fund approaches and passes the target retirement date.

Fund Strategy: The fund uses an asset allocation strategy designed for investors expecting to retire around the year 2020, with the allocation changing on an annual basis, becoming more conservative as the Fund nears the target retirement date. Invests in a combination of equity, fixed income and short-term JPMorgan Chase Bank, N.A. Commingled Pension Trust Funds and/or funds maintained by unaffiliated banks and trust companies, which includes vehicles with lower levels of active risk.

Fund Risk: The target date funds are designed for investors expecting to retire around the year indicated in each fund's name. The funds are managed to gradually become more conservative over time as they approach their target date. The investment risk of each target date fund changes over time as its asset allocation changes. They are subject to the volatility of the financial markets, including that of equity and fixed income investments in the U.S. and abroad, and may be subject to risks associated with investing in high-yield, small-cap, and foreign securities. Principal invested is not guaranteed at any time, including at or after their target dates. Additional risk information for this product may be found in the prospectus or other product materials, if available.

Fund short term trading fees: None

Who may want to invest:

- Someone who is seeking an investment option intended for people in or very near retirement and who is willing to accept the volatility of diversified investments in the market.
- Someone who is seeking a diversified mix of stocks, bonds, and short-term investments in one investment option or who does not feel comfortable making asset allocation choices over time.

Footnotes:

- The investment option is a collective investment trust. It is managed by JPMorgan Chase Bank. This description is only intended to provide a brief overview of the fund.
 - This investment option is not a mutual fund.
 - The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 01/20/2017. The returns are provided by Morningstar and reflect the historical performance of the oldest, eligible share class of the Pool with reported expenses and an inception date of 03/12/2010, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) The adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the Pool itself. Please refer to a Pool's offering materials for information regarding its' fees and expenses.
-

JPMCB SmartRetirement® Passive Blend 2025 Fund CF-A

VRS Code: 858688

Fund Objective: The Fund seeks high total return with a shift to current income and some capital appreciation over time as each Fund approaches and passes the target retirement date.

Fund Strategy: The fund uses an asset allocation strategy designed for investors expecting to retire around the year 2025, with the allocation changing on an annual basis, becoming more conservative as the Fund nears the target retirement date. Invests in a combination of equity, fixed income and short-term JPMorgan Chase Bank, N.A. Commingled Pension Trust Funds and/or funds maintained by unaffiliated banks and trust companies, which includes vehicles with lower levels of active risk.

Fund Risk: The target date funds are designed for investors expecting to retire around the year indicated in each fund's name. JPMCB SmartRetirement® Passive Blend 2040 Fund CF-A

VRS Code: 858690

Fund Objective: The Fund seeks high total return with a shift to current income and some capital appreciation over time as each Fund approaches and passes the target retirement date.

Fund Strategy: The fund uses an asset allocation strategy designed for investors expecting to retire around the year 2040, with the allocation changing on an annual basis, becoming more conservative as the Fund nears the target retirement date. Invests in a combination of equity, fixed income and short-term JPMorgan Chase Bank, N.A Commingled Pension Trust Funds and/or funds maintained by unaffiliated banks and trust companies, which includes vehicles with lower levels of active risk.

Fund Risk: The target date funds are designed for investors expecting to retire around the year indicated in each fund's name. The funds are managed to gradually become more conservative over time as they approach their target date. The investment risk of each target date fund changes over time as its asset allocation changes. They are subject to the volatility of the financial markets, including that of equity and fixed income investments in the U.S. and abroad, and may be subject to risks associated with investing in high-yield, small-cap, and foreign securities. Principal invested is not guaranteed at any time, including at or after their target dates. Additional risk information for this product may be found in the prospectus or other product materials, if available.

Fund short term trading fees: None

Who may want to invest:

- Someone who is seeking an investment option that gradually becomes more conservative over time and who is willing to accept the volatility of the markets.
- Someone who is seeking a diversified mix of stocks, bonds, and short-term investments in one investment option or who does not feel comfortable making asset allocation choices over time.

Footnotes:

- The investment option is a collective investment trust. It is managed by JPMorgan Chase Bank. This description is only intended to provide a brief overview of the fund.
- This investment option is not a mutual fund.
- The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 01/20/2017. The returns are provided by Morningstar and reflect the historical performance of the oldest, eligible share class of the Pool with reported expenses and an inception date of 03/15/2010, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) The adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the Pool itself. Please refer to a Pool's offering materials for information regarding its' fees and expenses.

JPMCB SmartRetirement® Passive Blend Income Fund CF-A

VRS Code: 858686

Fund Objective: The Fund seeks high total return with a shift to current income and some capital appreciation over time as each Fund approaches and passes the target retirement date.

Fund Strategy: The fund uses an asset allocation strategy designed for investors who are retired or expect to retire soon. Invests in a combination of equity, fixed income and short-term JPMorgan Chase Bank, N.A. Commingled Pension Trust Funds and/or funds maintained by unaffiliated banks and trust companies, which includes vehicles with lower levels of active risk.

Fund Risk: The fund is subject to the volatility of the financial markets, including that of equity and fixed income investments. Fixed income investments carry issuer default and credit risk, inflation risk, and interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Principal invested is not guaranteed at any time, including at or after retirement. Additional risk information for this product may be found in the prospectus or other product materials, if available.

Fund short term trading fees: None

Who may want to invest:

- Someone who is seeking an investment option intended for people in retirement and who is willing to accept the volatility of diversified investments in the market.
- Someone who is seeking a diversified mix of stocks, bonds, and short-term investments in one investment option and looking primarily for the potential for income and, secondarily, for share-price appreciation.

Footnotes:

- The investment option is a collective investment trust. It is managed by JPMorgan Chase Bank. This description is only intended to provide a brief overview of the fund.
 - This investment option is not a mutual fund.
 - The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 01/20/2017. The adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the Pool itself. Please refer to a Pool's offering materials for information regarding its' fees and expenses.
-

PIMCO Total Return Fund Institutional Class

VRS Code: 899622

Fund Objective: The investment seeks maximum total return, consistent with preservation of capital and prudent investment management.

Fund Strategy: The fund invests at least 65% of its total assets in a diversified portfolio of Fixed Income Instruments of varying maturities, which may be represented by forwards or derivatives such as options, futures contracts, or swap agreements. It invests primarily in investment-grade debt securities, but may invest up to 20% of its total assets in high yield securities. It may invest up to 30% of its total assets in securities denominated in foreign currencies, and may invest beyond this limit in U.S. dollar-denominated securities of foreign issuers.

Fund Risk: In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. The fund may invest in lower-quality debt securities that involve greater risk of default or price changes due to potential changes in the credit quality of the issuer. Foreign securities are subject to interest-rate, currency-exchange-rate, economic, and political risks, all of which may be magnified in emerging markets. Additional risk information for this product may be found in the prospectus or other product materials, if available.

Fund short term trading fees: None

Who may want to invest:

- Someone who is seeking potential returns primarily in the form of interest income rather than through an increase in share price.
- Someone who is seeking to diversify an equity portfolio with a more conservative investment option.

Footnotes:

- This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.

T. Rowe Price Blue Chip Growth Trust (Class T2)

VRS Code: 903117

Fund Objective: The Trust seeks long-term growth of capital and income.

Fund Strategy: The Trust primarily invests in common stocks of well-established large and medium-sized companies.

Fund Risk: Growth stocks can perform differently from the market as a whole and can be more volatile than other types of stocks. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. These risks may be magnified in foreign markets. Additional risk information for this product may be found in the prospectus or other product materials, if available.

Fund short term trading fees: None

Who may want to invest:

- Someone who is seeking the potential for long-term share-price appreciation.
- Someone who is willing to accept the generally greater price volatility associated with growth-oriented stocks.

Footnotes:

- The investment option is a collective investment trust. It is managed by T. Rowe Price Trust Company. This description is only intended to provide a brief overview of the fund.
 - This investment option is not a mutual fund.
-

Vanguard Retirement Savings Trust IV

VRS Code: 906626

Fund Objective: The Fund seeks to provide current and stable income, while maintaining a stable share value of \$1.

Fund Strategy: The Fund invests primarily in synthetic investment contracts backed by high-credit-quality fixed income investments and traditional investments issued by insurance companies and banks. The Fund seeks to achieve its objective by diversifying among high-credit-quality investments and investment contracts that are structured to smooth market gains and losses over time.

Fund Risk: The Contracts and securities purchased for the fund are backed solely by the financial resources of the issuers of such Contracts and securities. An investment in the fund is not insured or guaranteed by the manager(s), the plan sponsor, the trustee, the FDIC, or any other government agency. The Contracts purchased by the fund permit the fund to account for the fixed income securities at book value (principal plus interest accrued to date). Through the use of book value accounting, there is no immediate recognition of investment gains and losses on the fund's securities. Instead, gains and losses are recognized over time by periodically adjusting the interest rate credited to the fund under the Contracts. However, while the fund seeks to preserve your principal investment, it is possible to lose money by investing in this fund. The Contracts provide for the payment of certain withdrawals and exchanges at book value during the terms of the Contracts. In order to maintain the Contract issuers' promise to pay such withdrawals and exchanges at book value, the Contracts subject the fund and its participants to certain restrictions. For example, withdrawals prompted by certain events (e.g., layoffs, early retirement windows, spin-offs, sale of a division, facility closings, plan terminations, partial plan terminations, changes in laws or regulations) may be paid at the market value of the fund's securities, which may be less than your book value balance. Additional risk information for this product may be found in the prospectus or other product materials, if available.

Certain investment options offered by your plan (e.g., money market funds, short term bond funds, certain asset allocation/lifecycle funds and brokerage window) may be deemed by the Contract issuers to "compete" with this fund. The terms of the Contracts prohibit you from making a direct exchange from this fund to such competing funds. Instead, you must first exchange to a non-competing fund for 90 days. While these requirements may seem restrictive, they are imposed by the Contract issuers as a condition for the issuer's promise to pay certain withdrawals and exchanges at book value.

Fund short term trading fees: None

Who may want to invest:

- Someone who seeks a slightly higher yield over the long term than is offered by money market funds, but who is willing to accept slightly more investment risk.
- Someone who is interested in balancing an aggressive portfolio with an investment that seeks to provide stability of price.

Footnotes:

- The investment option is a stable value fund. It is managed by Vanguard. This description is only intended to provide a brief overview of the fund.
 - This investment option is not a mutual fund.
 - The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 10/31/2003. The returns are provided by Morningstar and reflect the historical performance of the oldest, eligible share class of the Pool with reported expenses and an inception date of 01/03/1989, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) The adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the Pool itself. Please refer to a Pool's offering materials for information regarding its' fees and expenses.
-

Vanguard Total Bond Market Index Fund Institutional Shares**VRS Code:** 844511**Fund Objective:** The investment seeks to track the performance of the Bloomberg U.S. Aggregate Float Adjusted Index.**Fund Strategy:** This index measures the performance of a wide spectrum of public, investment-grade, taxable, fixed income securities in the United States-including government, corporate, and international dollar-denominated bonds, as well as mortgage-backed and asset-backed securities-all with maturities of more than 1 year. All of the fund's investments will be selected through the sampling process, and at least 80% of its assets will be invested in bonds held in the index.**Fund Risk:** In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. Additional risk information for this product may be found in the prospectus or other product materials, if available.**Fund short term trading fees:** None**Who may want to invest:**

- Someone who is seeking potential returns primarily in the form of interest income rather than through an increase in share price.
- Someone who is seeking to diversify an equity portfolio with a more conservative investment option.

Footnotes:

- This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.
 - The Bloomberg U.S. Aggregate Float Adjusted Index measures the total universe of public, investment-grade, taxable, fixed income securities in the United States-including government, corporate, and international dollar-denominated bonds, as well as mortgage-backed and asset-backed securities-all with maturities of more than 1 year.
 - The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 09/18/1995. These calculated returns reflect the historical performance of the oldest share class of the fund, with an inception date of 12/11/1986, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) Please refer to a fund's prospectus for information regarding fees and expenses. These adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the fund itself.
-

Vanguard Total International Stock Index Fund Admiral Shares**VRS Code:** 895879**Fund Objective:** The investment seeks to track the performance of a benchmark index that measures the investment return of stocks issued by companies located in developed and emerging markets, excluding the United States.**Fund Strategy:** The manager employs an indexing investment approach designed to track the performance of the FTSE Global All Cap ex US Index, a float-adjusted market-capitalization-weighted index designed to measure equity market performance of companies located in developed and emerging markets, excluding the United States. The fund invests all, or substantially all, of its assets in the common stocks included in its target index.

Fund Risk: Foreign securities are subject to interest-rate, currency-exchange-rate, economic, and political risks, all of which may be magnified in emerging markets. Value and growth stocks can perform differently from other types of stocks. Growth stocks can be more volatile. Value stocks can continue to be undervalued by the market for long periods of time. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, economic or other developments. Additional risk information for this product may be found in the prospectus or other product materials, if available.

Fund short term trading fees: None

Who may want to invest:

- Someone who is seeking to complement a portfolio of domestic investments with international investments, which can behave differently.
- Someone who is willing to accept the higher degree of risk associated with investing overseas.

Footnotes:

- This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.
 - The FTSE Global All Cap ex US Index is part of a range of indices designed to help US investors benchmark their international investments. The index comprises large, mid and small cap stocks globally excluding the US.
 - The analysis on these pages may be based, in part, on adjusted historical returns for periods prior to the class's actual inception of 11/29/2010. These calculated returns reflect the historical performance of the oldest share class of the fund, with an inception date of 04/29/1996, adjusted to reflect the fees and expenses of this share class (when this share class's fees and expenses are higher.) Please refer to a fund's prospectus for information regarding fees and expenses. These adjusted historical returns are not actual returns. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the fund itself.
-

Fidelity® 500 Index Fund

VRS Code: 002328

Fund Objective: Seeks to provide investment results that correspond to the total return (i.e., the combination of capital changes and income) performance of common stocks publicly traded in the United States.

Fund Strategy: Normally investing at least 80% of assets in common stocks included in the S&P 500 Index, which broadly represents the performance of common stocks publicly traded in the United States.

Fund Risk: Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments.

Fund short term trading fees: None

Who may want to invest:

- Someone who is seeking the potential for long-term share-price appreciation.
- Someone who is seeking both growth- and value-style investments and who is willing to accept the volatility associated with investing in the stock market.

Footnotes:

- This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.
 - The S&P 500 Index is a market capitalization-weighted index of 500 common stocks chosen for market size, liquidity, and industry group representation to represent U.S. equity performance.
 - Returns prior to May 4, 2011 are those of the Premium Class and reflect the Premium Class' expense ratio. Had the Institutional Premium Class' expense ratio been reflected, total returns would have been higher.
-

Fidelity® Extended Market Index Fund

VRS Code: 002365

Fund Objective: Seeks to provide investment results that correspond to the total return stocks of mid- to small-capitalization United States companies.

Fund Strategy: Normally investing at least 80% of assets in common stocks included in the Dow Jones U.S. Completion Total Stock Market Index, which represents the performance of stocks of mid- to small-capitalization U.S. companies.

Fund Risk: Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Investments in smaller companies may involve greater risks than those in larger, more well known companies.

Fund short term trading fees: None

Who may want to invest:

- Someone who is seeking the potential for long-term share-price appreciation.
- Someone who is seeking both growth- and value-style investments and who is willing to accept the generally greater volatility of investments in smaller companies.

Footnotes:

- This description is only intended to provide a brief overview of the mutual fund. Read the fund's prospectus for more detailed information about the fund.
- The Dow Jones U.S. Completion Total Stock Market Index is an unmanaged index that represents all U.S. equity issues with readily available prices, excluding components of the S&P 500.
- Returns prior to September 8, 2011 are those of the Premium Class and reflect the Premium Class' expense ratio. Had the Institutional Premium Class' expense ratio been reflected, total returns would have been higher.

This document provides only a summary of the main features of the Plan and the Plan Document will govern in the event of discrepancies.

The Plan is intended to be a participant-directed plan as described in Section 404(c) of ERISA, which means that fiduciaries of the Plan are ordinarily relieved of liability for any losses that are the direct and necessary result of investment instructions given by a participant or beneficiary.
